

EDUBOOST

india's First AI- Powerd Student Success Opreating System

Product Management Capstone Project 2

By Vikas Vishwakarma

STRATEGIC PRODUCT DISCOVERY

EduBoost OS: The Executive Blueprint

India's First AI-Powered Student Success Operating System.

Vision

To become the operating system for student success by connecting education, skills, and employment.

Mission

Enable every student to achieve career success through data-driven learning and AI-powered guidance.

[Learn Smarter. Grow Faster. Earn Better.]

Rigorous product discovery establishes a validated foundation for development.

Discovery Deliverables Completed

✓	User Personas & Research Report
✓	Problem Statement & Market Analysis
✓	Competitor Analysis & SWOT Analysis
✓	Opportunity Matrix & Strategy Foundation
✓	Product Vision & Mission

Opportunity Conclusion: Create an AI-powered operating system that predicts success, recommends actions, and improves employability.

Launch Readiness

EduBoost OS: India's First AI-Powered Student Success Operating System

The Expectation Gap in Modern Education

The System

What Education Measures

- ✗ Marks
- ✗ Attendance
- ✗ Assignments
- ✗ Exams

The Market

What Companies Hire For

- ✓ Skills
- ✓ Projects
- ✓ Communication
- ✓ Problem Solving
- ✓ Industry Readiness

There is a massive data gap between academic output and industry requirements. EduBoost OS bridges this gap.

Macro tailwinds collide with acute systemic friction in higher education.

Friction Points

- Students focus exclusively on marks
- Lack of personalized career guidance
- Massive skills mismatch with industry
- Zero data-driven learning recommendations
- Critically low placement readiness

Opportunity: Growing demand for AI-powered educational platforms that connect learning outcomes directly with employability.

Macro Tailwinds

- Explosive growth of AI in Education
- Demand for Personalized Learning
- Rise of Career Intelligence Platforms
- Shift to Skill-Based Hiring
- Advances in Learning Analytics

A \$25B serviceable market remains unaddressed by legacy educational models.

A massive market opportunity fueled by the demand for connected, employable learning.

TAM - Total Addressable Market

\$400B+

All students globally using educational technology.

SAM - Serviceable Available Market

\$25B+

India's Higher Education & Skill Development Market (Diploma, Engineering, College Students, Job Seekers).

SOM - Serviceable Obtainable Market

100,000+ Users

Initial target expansion phase focusing purely on Polytechnic Colleges, Engineering Institutes, and Universities.

COMPETITIVE ANALYSIS

Existing platforms solve only fragmented pieces of the student journey.

	Competitors	Performance Prediction	Skill Tracking	Career Guidance	AI Mentor	Job Readiness
Moodle						
Coursera						
LinkedIn Learning						
Internshala						
EduBoost OS						

Key Insight: Existing platforms solve only one part of the student journey.
EduBoost OS provides the only end-to-end success ecosystem.

STRATEGIC POSITIONING

Capitalizing on AI adoption to bridge the unified operating system gap.

The Void (Market Gaps)

- No unified student operating system
- No AI-powered success prediction
- No personalized career roadmap
- No integrated job readiness score

STRENGTHS

- AI-driven insights
- Personalized recommendations
- Career-focused approach

WEAKNESSES

- Requires high-quality baseline student data
- High initial trust-building threshold

OPPORTUNITIES

- Explosive EdTech market growth
- Mainstream AI adoption in education

THREATS

- Large legacy EdTech competitors
- Shifting regulatory changes

Meet Our Users: Four Personas, One Ecosystem

Our research process — surveys, interviews, competitor analysis, and community observation — revealed four distinct user archetypes. SkillSetu AI is designed to serve each of them seamlessly.

sourbh nayak , 19

Vikas is a diploma student from a small town who wants to improve his academic performance, develop technical skills, and secure a high-paying job. He often struggles to find the right learning path and career guidance. EduBoost OS helps him through AI-powered study plans, performance prediction, skill tracking, and personalized career recommendations.

Sneha Sharma, 21

Sneha is a final-year engineering student aspiring to become a Data Scientist. She faces difficulty identifying the most important skills, certifications, and preparation strategies for placements. EduBoost OS supports her with career intelligence, skill gap analysis, interview preparation, and an AI mentor that provides personalized guidance.

Arjun Mehta, 23

Recent Graduate · Fresher
Arjun has recently completed his graduation and is actively searching for employment opportunities. Despite applying for multiple jobs, he receives few interview calls due to limited industry exposure and an ineffective resume. EduBoost OS assists him through resume analysis, job readiness assessment, career recommendations, and targeted upskilling plans.

Priya Verma, 28

Priya is responsible for monitoring student progress and improving placement outcomes within her institution. She finds it challenging to track student performance and identify those who require additional support. EduBoost OS provides predictive analytics, student performance dashboards, risk detection, and placement readiness insights, enabling data-driven academic interventions.

MARKET SEGMENTATION

Two distinct user profiles anchor the immediate serviceable market.

Engineering Student Segment		Diploma Student Segment	
Demographics: Median Age 20		Demographics: Median Age 19	
Core Goals	- Securing premium placements - Achieving higher salary bands - Continuous technical skill development	Core Goals	- Securing immediate internships - Fundamental job preparation - Steady academic improvement
Diagnostic Pain Points	- Overwhelming career confusion - Complete lack of an actionable roadmap - Poor strategic planning capabilities	Diagnostic Pain Points	- Severe lack of professional guidance - Significant deficits in professional confidence

PRIMARY RESEARCH

Ground-truth evidence reveals a critical deficit in career direction and personalization.

METHODOLOGY BASELINE | Sample Size: 100+ Students | 20+ Faculty | 10+ Placement Coordinators | Evaluated via Interviews, Surveys & Focus Groups.

80%

of students completely unsure about their optimal career path.

75%

demand AI-powered study and academic pathway recommendations.

72%

report a critical need for personalized, 1:1 career guidance.

68%

actively struggle with time management and strategic academic planning.

THE TRANSFORMATION

Replacing a linear, dead-end timeline with a continuous AI-driven success loop.

Current State (Broken Timeline)

Future State with EduBoost OS

A foundational intelligence layer supporting the entire student lifecycle.

EduBoost OS is not just a tool; it is a self-reinforcing engine for career success.

Strategic validation confirms our advantage in a high-growth, AI-ready market.

Strengths

AI-driven predictive insights; highly personalized recommendations; specialized career-focused approach

Opportunities

Rapidly growing global EdTech market; massive surge in institutional AI adoption

Weaknesses

Efficacy requires high-quality student data intake; initial trust-building required in academic settings

Threats

Highly capitalized legacy EdTech competitors; shifting educational regulatory changes

The Gaps We Exploit

The market lacks a unified student OS, AI-powered success prediction, personalized career roadmaps, and integrated job readiness scoring

EduBoost OS delivers compounding value across three core pillars.

Empowering students to make smarter decisions through AI predictions, personalized guidance, and job readiness intelligence.

Academic Outcomes

Transitioning students from “studying for marks” to engaging with data-driven learning recommendations to optimize baseline knowledge.

Skill Development

Bridging the industry gap by actively tracking competencies against real-world job requirements rather than just measuring syllabus completion.

Placement Rates

Converting raw academic effort into high-visibility career readiness, ensuring students are explicitly prepared for targeted hiring pipelines.

EduBoost OS — Product Design Phase

Transforming research insights into a user-centric, AI-powered experience that helps students learn smarter and achieve better career outcomes.

Engineering the User Experience

1. Discover

Researched students. Identified low motivation, poor time management, and zero industry exposure.

1.

3. Ideate

Mapped solutions (Prediction, Skill Tracking, AI Mentor).

3.

5. Testing

Validated with key stakeholders (Students, Teachers, Placement Cells).

5.

2. Define

Core friction point—students study hard but lack direction on what to learn for specific careers.

2.

4. Prototype

Established the UI identity. Dark theme, glassmorphism UI, modern analytics cards, AI widget.

4.

Design Goals & Principles

Five guiding principles shape every design decision in EduBoost OS.

Simplicity

Intuitive interfaces that reduce cognitive load for students and educators.

Personalization

AI-driven experiences tailored to each student's goals and learning style.

Accessibility

Inclusive design ensuring every student can engage with the platform.

Trust & Transparency

Clear, honest AI recommendations that students and educators can rely on.

Actionable Insights

Data-driven guidance that translates into real next steps for students.

The Design Thinking Engine

The Design Thinking Process

1

Empathize

Understand students, teachers, and placement officers through research.

2

Define

Identify core challenges: career confusion, skill gaps, and poor planning.

3

Ideate

Generate solutions: AI Mentor, Career Prediction, Skill Tracker, Study Planner.

4

Prototype

Create low-to-high fidelity designs to explore and communicate ideas.

5

Test

Validate with real users and iterate based on feedback.

Student User Journey

A streamlined nine-step flow reduces decision-making effort and guides every student from onboarding to placement readiness.

Each step builds on the previous, creating a clear path from enrollment to career success.

Eight Core Navigation Areas

EduBoost OS organizes every feature into clear, purposeful sections — reducing complexity and speeding up access to the tools students and educators need most.

- Dashboard — At-a-glance performance overview
- Performance Analytics — Academic trends and scores
- Skill Intelligence — Gap analysis and growth tracking
- Study Planner — Personalized learning schedules
- Career Center — Jobs, internships, and pathways
- AI Mentor — Conversational guidance and support
- Progress Tracker — Milestones and readiness
- Settings — Personalization and preferences

Design Deliverables & Vision

Research & Structure

- User Flow
- Information Architecture
- Wireframes

Visual Design

- UI Design System
- Dashboard Mockups
- AI Mentor Screens

Validation & Handoff

- Interactive Prototype
- Usability Testing Report
- Developer Handoff Files

EduBoost OS will deliver a modern, AI-powered operating system experience — helping students learn smarter, build skills faster, and achieve better career outcomes.

Frictionless Journey to Placement Readiness

Hub-and-Spoke Navigation Architecture

Architectural Benefits

- ✓ Clear Navigation
- ✓ Reduced Complexity
- ✓ Faster Access to Features

Structural Validation Before Visual Design

Deliverable: Black & White Wireframes to validate structure without visual bias.

- **Referral:** 25% of retained users invite peers organically
- **Revenue:** 50% of referred users convert to premium subscriptions

UX FRAMEWORK

HEART Framework: Measuring What Matters

Google's HEART framework adapted for EduBoost OS — tracking the full student experience from satisfaction to task completion.

Happiness

NPS Score & Student Satisfaction surveys measuring emotional connection to the platform

Engagement

Session Duration & Feature Usage frequency across core learning tools

Adoption

New Feature Usage rates tracking how quickly students embrace product updates

Retention

Monthly Return Rate measuring consistent platform re-engagement

Task Success

Study Plan Completion rate as the primary outcome signal

User Metrics Dashboard

WAU DAU

Core Engagement Signals

DAU / WAU / MAU

Daily, Weekly, and Monthly Active Users tracked with trend analysis

Retention Rate

Cohort-based return rate measured at 7, 30, and 90-day intervals

Churn Rate

Monthly user attrition segmented by plan type and onboarding stage

Session Duration

Average time-on-platform per active user, benchmarked by feature

Business Metrics & Revenue Health

\$1.2M

Monthly Recurring Revenue
Combined institutional and individual premium subscriptions

\$48

Average Revenue Per User
Blended ARPU across free, premium, and institutional tiers

\$120

Customer Acquisition Cost
Marketing + sales cost per converted premium user

\$860

Customer Lifetime Value
Projected 18-month revenue per retained premium subscriber

Revenue Trajectory

MRR growth is accelerating alongside improving free-to-premium conversion — a strong signal of product-market fit and pricing effectiveness.

Product Feature Analytics

Feature Adoption Insights

- **AI Mentor** leads in daily usage — highest engagement and satisfaction across all segments
- **Study Planner** shows strong weekday consistency, indicating habitual use
- **Career Intelligence** peaks mid-week, aligned with career planning workflows
- **Resume Analyzer** has the highest growth potential — lowest current adoption

Track feature usage frequency, session depth, and user satisfaction scores to prioritize roadmap investment.

STRATEGY & ALIGNMENT

OKRs & KPI Tracking

Objective 1 — Increase Student Success

KR1: Study Plan Completion → 85%

Placement Readiness

Career outcome prediction accuracy

EduBoost OS is not measuring platform activity. EduBoost OS measures student success outcomes.

 **Measure Learning. Predict Growth. Drive Success.**

Go-To-Market Strategy & Scale

Primary Audiences: Diploma Students, Engineering Students, Final Year Students, Placement Cells.

EduBoost OS

From Learning to Earning with AI

EduBoost OS is the AI-Powered Student Success Operating System — purpose-built to transform students from passive learners into career-ready professionals. Through intelligent guidance, adaptive skill development, and predictive success analytics, EduBoost OS bridges the critical gap between education and employment for millions of students across India.

PRODUCT MARKETING LAUNCH

EDTECH PLATFORM

AI-POWERED

Go-To-Market Strategy

EduBoost OS launches in four deliberate phases — starting with government polytechnic colleges where placement readiness is highest, then scaling through engineering colleges, universities, and ultimately achieving national reach. Each phase validates product-market fit before expanding.

10K

Students Target

Active users within the first year of launch

50

Colleges Onboarded

Institutional partnerships secured

100

Faculty Users

Educators driving adoption

80%

Activation Rate

Target student engagement benchmark

Target Audience

EduBoost OS serves a multi-layered ecosystem — from students seeking career clarity to institutions driving placement outcomes and recruiters seeking job-ready talent. Each audience has distinct needs, and the platform is designed to deliver value at every level.

Primary Users — Students

- Diploma Students seeking structured career pathways
- Engineering Students building technical and soft skills
- Final Year Students preparing for campus placements
- Fresh Graduates entering the job market

Secondary Users — Institutions

- Faculty Members tracking student progress and outcomes
- Placement Officers managing institutional hiring pipelines
- Educational Institutions seeking data-driven placement success

Tertiary Users — Employers

- Recruiters accessing pre-vetted, placement-ready candidates
- Hiring Partners building campus talent pipelines

Positioning Strategy

The market is fragmented — no single platform owns the full student journey. EduBoost OS consolidates learning, networking, job discovery, and career preparation into one intelligent operating system.

Competitive Landscape

Traditional LMS

Course delivery only —
no career outcomes

LinkedIn

Networking only — no
skill development

Internshala

Internships only — no
academic guidance

Coursera

Courses only — no
placement support

EduBoost OS: The Unified Solution

EduBoost OS helps students predict academic outcomes, build skills, prepare for careers, and increase placement readiness through one intelligent platform.

Learn Smarter

Build Skills Faster

Get Hired Better

Pricing Strategy

EduBoost OS uses a tiered freemium model designed to maximize adoption while creating clear upgrade incentives. Students experience core value for free, then unlock premium features as their career ambitions grow. Institutions receive enterprise-grade tools with custom pricing.

Free Plan ₹0 — Forever Free • Performance Prediction • AI Study Planner • Basic Dashboard • Career Suggestions	Pro Plan ₹199/month • Advanced Analytics • AI Mentor • Resume Analyzer • Skill Intelligence • Interview Preparation	Institution Plan Custom Pricing • Faculty Dashboard • Placement Analytics • Student Monitoring • Institutional Reports
---	--	---

 The Pro Plan at ₹199/month is intentionally priced below the cost of a single career coaching session — making premium AI guidance accessible to every student.

Product-Led Growth Engine

EduBoost OS grows through its own product experience. Students discover value immediately, share their progress organically, and invite peers — creating a self-sustaining viral loop that reduces acquisition costs and accelerates adoption across campuses.

This flywheel turns every active student into a growth channel — reducing CAC while building a community of engaged, referral-driven users.

14-Day Premium Trial

Every new user unlocks full Pro features for 14 days — experiencing AI Mentor, Resume Analyzer, and Interview Prep before deciding to upgrade.

Referral Rewards Program

Students who invite friends earn premium extensions, skill badges, and exclusive content. The more they share, the more they gain — aligning individual incentives with platform growth.

Distribution Channels

EduBoost OS reaches students through three interconnected channel strategies — digital discovery, institutional partnerships, and strategic alliances — ensuring presence wherever students are already spending their time.

Digital Channels

- Website & Mobile App (iOS + Android)
- SEO-driven organic discovery
- Content marketing & thought leadership
- Paid social and search campaigns

Educational Channels

- Direct college and university partnerships
- Placement cell integrations
- Faculty networks and educator referrals
- Student community groups and clubs

Strategic Partnerships

- EdTech platform co-marketing agreements
- Training institute affiliations
- Recruitment company integrations
- Government skill development programs

Growth Marketing Strategy

EduBoost OS combines search visibility, social engagement, and value-driven content to build a consistent pipeline of qualified student users. Each channel reinforces the others — creating a compounding growth effect across the student lifecycle.

SEO Keyword Strategy

- Student Career Guidance
- Placement Preparation
- Skill Development Platform
- AI Learning Platform
- Student Success System

Social Media & Content

Instagram Career tips, student stories, reels	LinkedIn Placement guides, institutional content
YouTube AI learning resources, tutorials	Telegram Student communities, updates

📄 Content pillars — Career Tips, Placement Guides, Student Success Stories, and AI Learning Resources — are designed to rank organically while driving high-intent traffic to the platform.

Community & Influencer Marketing

EduBoost OS isn't just a product — it's a movement. By building campus communities, empowering student ambassadors, and partnering with trusted voices in career and tech, EduBoost OS creates authentic, peer-driven growth that no ad budget can replicate.

Community Building

- **EduBoost Student Clubs** — Campus-based chapters driving local adoption
- **Campus Ambassadors** — Student leaders representing EduBoost on their campuses
- **Discord & Telegram** — Real-time peer support and resource sharing
- **LinkedIn Community** — Professional networking and alumni connections

Influencer Partnerships

Tech Creators

YouTube and Instagram creators in the edtech and student life space

Career Coaches

Trusted mentors with engaged student audiences seeking guidance

Placement Mentors

Industry professionals sharing real hiring insights and tips

Student Influencers

Relatable peer voices sharing authentic platform experiences

Community Goal: Build India's largest student success ecosystem — connecting learners, mentors, and employers in one thriving network.

Launch Plan & Growth Roadmap

EduBoost OS launches in three coordinated waves — building anticipation, driving activation, and scaling through referrals and institutional partnerships. Every phase has clear deliverables and measurable outcomes.

Launch Deliverables

- 01
GTM Plan & Marketing Campaign
- 02
Product Launch Strategy
- 03
Growth & Referral Program
- 04
Community Building Plan
- 05
Product-Led Growth Framework

Final Vision

"EduBoost OS will become India's AI-Powered Student Success Operating System — helping millions of students bridge the gap between education, skills, and employment."

From first login to first job offer, EduBoost OS is the platform that changes what's possible for every student in India.

EDUBOOST OS

Non Tech to Tech PM Startegy

A Product Manager doesn't need to be a software engineer, but should understand technology.

Measure Learning. Predict Growth. Drive Success.

A New Infrastructure Layer for Success

We are not building a tool. We are building the foundational dashboard that manages a student's entire trajectory toward a high-paying career.

The Data-to-Outcome ML Pipeline

The 4-Pillar AI Engine

Predict (Performance AI)

Predicts semester marks, grades, attendance impact, and success probability using predictive ML. Identifies risk levels.

Upskill (Skill Intelligence)

Tracks coding, soft skills, and aptitude. AI Study Planner automatically generates daily/weekly exam schedules (e.g., 7:00 DSA, 8:30 Aptitude).

Guide (Career Mentor)

The ChatGPT for Students. Predicts best-fit paths (Data Scientist, PM, UI/UX) based on branch and interests. Provides real-time career guidance.

Validate (Resume & Readiness)

AI Resume Analyzer checks ATS scores. Introduces the proprietary Job Readiness Index to quantify employability.

Quantifying Employability: The Job Readiness Index

Unique Feature: Real-time Industry Alignment Score

Coding: 85

Projects: 80

Leadership: 75

Communication: 70

Aptitude: 60

Shifting the focus from isolated academic metrics to a holistic, algorithmic assessment of market readiness.
